

Nursenav Oncology

Patient Navigation E-mail System

<http://aultman.mynursenav.com>

Aultman is using the Nursenav oncology software solution to assist us in improving communications with our oncology patients. In the event that you are interested and capable of using the Internet to communicate with your patient navigator, a free "My Nursenav" account will be established for you.

You will receive the following invitation e-mail in your personal e-mail account, allowing you to set up and activate your own My Nursenav account at no charge. Your navigator will provide you with a temporary password that you will be required to change upon logging into the site. This account can only be used to communicate with your patient navigator.

Initial Invitation E-mail

Welcome to My Nursenav. Use the following information to log in:

Username: your home e-mail address

Password: given to you by Brandy Hahn, RN, BSN, your patient navigator

Click here to log in or go to <http://aultman.mynursenav.com>

When you have a message waiting from your patient navigator, you will receive a message in your personal e-mail account. Therefore, you will always know when to check your MyNursenav account.

Message Received

You have received a new message in My Nursenav. You can click here to log in and view it.

If you are having a technical difficulty with My Nursenav, please contact Patient Navigator Brandy Hahn at 330-363-6891.
